## **DETAILED ACTION**

- 1. This Office action is in response to application 09/750,772, filed on 01/02/2001.
- 2. Claims 1-42 are presented for examination.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- 4. Claims 1-42 are rejected under 35 U.S.C. 102 (e) as being anticipated by Cerf et al. (U.S. Pat. No. 6,418,138).

As per claims 1, 3-6, 8-12, 15-28, 30-34 and 36-42 Cerf discloses a novel communication system/method that includes mobile units distributed within a wireless

Art Unit: 3621

communication network which are connected to a packet switched network (a method for public wireless network access), the method comprising the steps of:

detecting the presence of a local Area Network (LAN) with at least one mobile device at a location (see., abstract, col 2, lines 35-45, col 4, lines 51-67, col 5, lines 45-56);

requesting identification information from each at least one mobile device through a node of the LAN (see., abstract, , col 3, lines 12-34, the gateway or proxy server is capable of identifying information);

sending user information from each at least one mobile device to the node, the user information including identification and demographic information about a user of each at least one mobile device (see., abstract, col 2, lines 35-45, col 4, lines 51-67);

receiving access to the LAN with the at least one mobile device (see., abstract, col 4, lines 51-67); accessing a global communication data network through a gateway of the LAN with the at least one mobile device (see., abstract, col 3, lines 11-27);

sending the demographic information about the users of the at least one mobile devices at the location to an advertising server (see., abstract, col 3, lines 37-59, col 5, lines 45-56); receiving commercial messages through the gateway from the advertising server, the commercial messages being selected based on the demographic information of the users (see., abstract, col 3, lines 11-27); and

sending the commercial messages to a display at the location for viewing by the users (see., abstract, col 1, lines 12-65, col 3, lines 37-59).

Application/Control Number: 09/750,772

**Art Unit: 3621** 

As per claims 2, 7, 13, 14, 29 and 35 Cerf discloses the claimed method, wherein the
